

Looking for support with providing Distance Learning?

As an EdTech Demonstrator School, [Cheam Common Junior Academy](#) is now supporting the delivery of the Department for Education's new national programme, providing peer-led advice and training to help schools and colleges use technology to support remote teaching and improve their digital capability.

We are able to offer you:

- Web based guidance such as how-to videos and downloadable documents.
- Interactive digital support including webinars or live and interactive training sessions.
- Facilitated support such as peer to peer support or being part of a community of practice.
- Strategic support with devising a long term strategy.

We are also able to discuss anything else that would support your school to deliver high-quality remote learning. All support is fully funded by the Department for Education and delivered with other members of [LEO Academy Trust](#). It will initially be available remotely via video conferencing, with on-site support available at a later date.

The EdTech Demonstrator Programme includes a network of schools and colleges across England who exhibit effective practice in the use of technology. Please make use of this to help develop the use of technology in your school.

For more information, and to register an interest in the programme, please visit [this website](#).

“Having worked in partnership with Cheam Common Junior Academy and LEO Academy Trust for a number of years, the development of their digital culture has been impressive. As a school, we have benefitted greatly from their support. Cheam Common Junior’s recognition by the Department for Education as an EdTech Demonstrator School, is well deserved.”

Steve Trow, Headteacher, Earlsfield Primary School, Wandsworth
